

WEB DESIGN AND DEVELOPMENT CURRICULUM

WD108 WordPress 1 Pop Quiz

WD108 Pop Quiz

Hello! Up to this point you should have had a decent amount of HTML and CSS, has it sunk in? Let's find out! You have 30 minutes to create a two column website with a header and a footer. Do not worry at all about making this pretty, or designing it all for that matter. This is the down and dirty, get some code out there on the page using HTML and then style it using CSS. 30 minutes, go!

Requirements

- One Page: Create one (1) HTML page.
- Site Width: The width of the site is 900px and centered on the page
- Site Height: The site should have a dynamic height that allow for the content in it to determine the site's height. The site should have a minimum height of 300px though.
- Two Columns: You must have two (2) columns
- Header: You must have a header with a fixed height
- Footer: You must have a footer with a fixed height
- Background Color: Each element should have a background color that allows you to see the space that it takes up.
- Code: Use HTML and CSS. The CSS should be an **EXTERNAL** CSS file!
- Time Limit: You only have 30 minutes.

Here is what the final product should look like:
